RE: Neogen to discontinue BioLumix® products and replace with Soleris® products

Dear Valued BioLumix Customer,

Since the acquisition of BioLumix, Neogen has been working tirelessly to provide you with high quality, high performance vials for your testing needs. Following an extensive research, development and validation effort, we are pleased to inform you that we are launching new vials with the quality, stability and value you expect.

Effective August 1, 2018, Neogen will begin transitioning to the new vials. As we make this transition, all BioLumix vials will be discontinued and replaced with new vials in a new format under the Soleris brand name.

Neogen has completed a full validation of all replacement vials against USP methodology and will provide a new validation book, as well as guidance documents, to support the transition. The new vials are also available to perform your own validations as required.

The chart on the back of this letter provides guidance on the replacement vials and supplements as well as some accessory products that are being deleted. Your Neogen sales representative will be following up with you in the next few days to provide further information and to answer your questions about the transition.

Neogen is committed to supplying products that meet your quality and product performance standards. We thank you for your business and continued support of Neogen products.

Sincerely,
